Latest Version of Opera

Apple's Safari

Download At

<http://browser.netscape.com>

<http://www.mozilla.org/>

<http://www.microsoft.com/windows/ie/downloads/>

<http://www.opera.com/download/>

<http://www.apple.com/downloads/macosx/apple/safari.html>

Other Suggestions

While not required, it is recommended that Lile's Asset Management System is viewed on a monitor supporting a resolution of at least 1024x768, and displaying 256 colors.

Note

Lile's Asset Management System is often accessed from computers residing on networks that are configured with additional security or content management controls, such as proxy servers. If your computer's web browser meets the above, but you receive errors while accessing Lile's asset management system, please contact your I.T. Department to ensure that there is no software and/or hardware deployed on your company's network that may interfere with your compliance with the above requirements.
